

FISHERIES SECTOR TREND ANALYSIS

Strategic objective: Scale up production and industrial processing of fisheries and other marine products.

2017 Baseline	2023 MTNDP Baseline	2025 Actual	2030 Target
Le 70.9m	Le 105m	Le 163m	Le 150m
Industrial fishery catch and effort estimate	Revenue generation benchmark	Ministerial disclosure, 7 Jan 2026	MTNDP 2024-2030, page 62

Revenue generation trend versus 2030 target

2025 revenue is 108.7% of the 2030 target, suggesting early achievement and scope for higher ambition.

2030 Target Progress

Key trend messages

- Revenue rose by 48.1% between 2017 and 2023, from Le 70.9m to Le 105m.
- Revenue accelerated by 55.2% from 2023 to 2025, reaching Le 163m.
- Overall growth from 2017 to 2025 was 129.9%, equal to an estimated CAGR of 11.0%.
- The 2030 target has been exceeded early, but the figure may still understate the true revenue potential of fisheries.

Scorecard interpretation

Status: Target achieved ahead of 2030. Rate as achieved, while recommending upward revision of the target and deeper tracking of licensing, landing fees, exports, compliance, processing and value addition.
